We see this address is mortgaged. We have undertaken sweeps of the area demographic and taken into account lending status, mortgage trends at the time of purchase, estimations of initial investment paid and types of mortgages available from the lender during this period. We estimate that current equity for this address would likely be in the remit 10-20%.

We have also noted a downturn in property value in this region hence we see no increase in property value since the original sale in 2018. We would estimate that the property value remains in the region of £190-210K. Therefore, we estimate current joint equity to be approximately £30K, and personal equity to be in the remit of £15K.
